There are well over 220 Doosan service and sales locations operating in Canada and the United States. What's more, there are more than 90 independent sellers moving forklift materials and materials handling equipment. This system permits Doosan Infracore America to aggressively compete in this competitive market. The forklift product line remarkably features 63 different models consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion lift trucks. Capacities of these numerous vehicle versions range from 3,000 to 33,000 lbs. All trucks are built in an ISO 9001 qualified facility.

Doosan Infracore America is the fastest growing forklift and lift truck corporation in the North American marketplace, thanks to its excellent level of product performance and their persistently high level of client support and service given to all Doosan Infracore Forklift users. The U.S. lift Truck division based in Cleveland has a expert team knowledgeable in Product Sales, Purchasing, Marketing, Logistical and Technical Support.

Korea's original home-based lift truck market was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. started to import assembled lift trucks as part of a national machinery expansion venture. Initial sales of this industrialized equipment focused on large business groups, the armed services and on state-run corporations. This eventually led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced business operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a forklift production plant was successfully completed. Continuous technical training became the new focus for improving quality and product development.

Daewoo began the first domestic forklift business in 1967, and quickly gained a massive 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's progressive technological enhancements combined with sales success placed them in a position of significant expansion of their lift truck business.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a cooperative venture project to help them in the highly competitive North American materials handling industry. This project proved highly profitable for Daewoo and their lift truck product sales expanded greatly. In 1984, the company completed development of a new facility to help in manufacturing high end value-added products for export. In 1993, the company had a global sales network and started exporting models they had developed through in-house expertise, as a sovereign product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion possibilities into international markets.
